EDUCATION

B.Sc in Software Engineering

<https://www.aastu.edu.et/>

Sep 2022 – Aug 2027
Addis Ababa, Ethiopia

Relevant Coursework: Internet Programming, Database Systems, Object-Oriented Programming (Java), Operating Systems, Computer Architecture

PHP & Laravel Development Certification (Udemy)

<https://www.udemy.com/certificate/UC-7ea7737f-8495-4412-9ee4-42cdb1afaea8/>

06/2025 – 08/2025
Addis Ababa, Ethiopia

Completed a comprehensive PHP and Laravel course on Udemy, covering MVC architecture, routing, authentication, Eloquent ORM, RESTful APIs, and deployment fundamentals, gaining hands-on experience building scalable and secure web applications using modern best practices.

Flutter App Development Certification (Udemy)

<https://www.udemy.com/certificate/UC-f4ccdf34-a802-4ef8-939b-684430e63292/>

01/2026 – 04/2026
Addis Ababa, Ethiopia

Completed a comprehensive Flutter development course on Udemy covering Dart programming, responsive UI design, state management, API integration, Firebase, and cross-platform mobile application development for Android and iOS.

PROJECTS

EduVox – Online Learning Platform 🔗

- Developed a full-featured e-learning platform **using Flutter**, enabling instructors to upload and manage courses while allowing students to **browse, purchase**, and access educational content.
- Integrated **Chapa** for secure online **course payments** and used **Cloudinary for efficient cloud-based media and file storage management**.
- Implemented authentication, **role-based access control**, **responsive UI/UX**, and scalable backend functionality to ensure a smooth and secure learning experience across devices.

Employer Job Management 🔗

- Built a secure employer dashboard using Laravel Blade with role-based authentication and middleware, enabling verified employers to create, edit, and manage job listings with restricted access controls.
- Utilized Eloquent ORM with soft deletes and audit-friendly methods to safely remove job postings while preserving full record history in the MySQL database

Recipe Explorer App – Flutter Mobile Application 🔗

- Cross-platform mobile app** built with Flutter and Dart that enables users to discover recipes through category browsing and advanced dietary filtering (Vegan, Vegetarian, Gluten-Free, Lactose-Free)
- State Management:** Implemented Flutter Riverpod for scalable data flow and state synchronization across multiple screens
- Core Features:** Category-based recipe navigation, dynamic filtering system, favorites management with real-time UI updates, and responsive Material Design interface
- Architecture:** Designed modular, maintainable codebase with clear separation of concerns (providers, models, widgets, screens)
- Deployment:** Successfully deployed to web, iOS, and Android platforms with live demo and native APK distribution
- Technical Skills Demonstrated:** Advanced state management, complex filtering logic, multi-screen state synchronization, and responsive UI/UX design

SKILLS

Languages: Python, SQL, C++, Java, PHP, HTML/CSS, Dart, JavaScript, TypeScript,

Frameworks: Laravel, Flutter, Riverpod, NextJS, React, NodeJS, Tailwind CSS, FAST API

Developer Tools: Docker, Git/GitHub, Postman, VsCode, IntelliJ
